

Letter of support

To whom it may concern:

With the following letter, Prof. Alicia Salvador, as head of the Laboratory of Social Cognitive Neuroscience (LabNSC), express our willingness to collaborate with the project "**Architecture for Personalized Multimodal Body Computer Interfaces (ArPeMBoCI)**", applicant for the EU 2020 CHIST-ERA Call. The Laboratory of Social Cognitive Neuroscience is a research group from the University of Valencia, Spain (<https://www.uv.es/labnsc>), included in the Department of Psychobiology and IDOCAL, at the Faculty of Psychology.

The LabNSC has its own spaces and devices to carry out experimental studies:

- Equipment for determination of hormones and other chemical substances.
- Brain Vision system: acquisition and analyses of EEG, Evoked Potentials and ERPs.
- Electrophysiological systems to register different parameters: ECG, EMG, EDA, startle response in laboratory and ambulatory situations.
- Equipment to register and analyze behaviors (face and body movements) in individual and group interactions.

Yours sincerely,

Prof. Alicia Salvador,
head of the Laboratory of Social Cognitive Neuroscience (LabNSC).
Valencia, 19th February 2021
